

William Shatner Menyambut Kembali ke Star Trek sebagai Ide yang Menarik, Sarankan Teknologi Digital untuk Muda-ulang dan Kembali Berperan Sebagai Kirk – TrekMovie.com

Description

William Shatner may return as James T. Kirk

William Shatner, who turned 93 in March, is still open to the idea of returning to the role of James T. Kirk, the iconic character he last played 30 years ago. In a recent interview, Shatner expressed his interest in reprising the role if there is a genuine reason for the character to appear.

Possibility of de-aging to bring back Kirk

Shatner hinted at the possibility of playing a younger version of Kirk using de-aging technology. He has recently signed on to be the spokesperson for OTOY, a technology company that specializes in de-aging technology, which could make him look decades younger in a film.

Digital de-aging in the film industry

Digital de-aging has become more common in films today, with examples such as Indiana Jones and the Dial of Destiny. Star Trek has also used digital de-aging, such as in Star Trek: Picard to de-age characters like Data, Picard, and Riker. Still, bringing back Shatner as Kirk would require a specific reason due to the expense involved.

Shatner's humorous take on bringing back Kirk

Shatner also humorously mentioned the idea of bringing back Kirk after freezing his brain and body, making light of the various scenarios that could bring the character back to life. Despite the humor, his openness to the idea of returning as Kirk adds an intriguing possibility to the Star Trek franchise.

The future of James T. Kirk in Star Trek

The Star Trek franchise has already recast the role of James T. Kirk twice with younger actors, such as Chris Pine in the feature films and Paul Wesley in the Strange New Worlds television series. However,

the potential return of Shatner as Kirk could add a new dimension to the character.
